

KEVIN S. LIN

Dallas, Texas • 214-901-7207 • lin.info.24@gmail.com
Website: lininfo24.github.io • LinkedIn: linkedin.com/in/kl24

SKILLS

Programming: C#, .NET, MVC, Python, JavaScript, React, SQL, LINQ, Entity Framework
APIs & DevOps: REST API, JSON, OAuth 2.0, Postman, RabbitMQ, CI/CD, Docker, Git
Data: SQL Server, Cosmos DB, NoSQL, Redis, SSIS, SSRS, ETL, Tableau
Artificial Intelligence: Large Language Models (LLMs), Natural Language Processing (NLP), Generative AI, Azure OpenAI Services, Azure AI Document Intelligence, GPT-5.1, GitHub Copilot

PROFESSIONAL EXPERIENCE

Senior Software Developer Independent Consultant	2024 – Present Remote
- Automated the generation of test cases and end-to-end test scripts using generative AI technologies, reducing manual testing effort by 42%. LLM, Playwright. - Designed and implemented an AI-powered Q&A chatbot for an internal support platform, improving response time by 21%. Python, Azure OpenAI Services, LLM, Azure AI Search. - Developed and maintained key features of a resource management system. C#, JavaScript.	
Senior Software Developer Consilio	2022 – 2023 Remote
- Collaborated with a global, cross-functional team of 10+ to design, develop, and support custom data-centric software within an Agile framework. Jira, Confluence, GitHub. - Integrated third-party APIs, including Microsoft Graph API, for eDiscovery and legal hold applications. C#, RabbitMQ, Message Queue, OAuth 2.0. - Led cross-functional team efforts to re-engineer a legacy system, achieving a 25% improvement in system efficiency. C#, .NET Core, JavaScript, Bootstrap.	
Software Developer Texas A&M University	2017 – 2022 College Station, TX
- Analyzed requirements, designed, and coded a workflow management system, increasing operational efficiency by 82%. C#, ASP.NET, SQL Server. - Built AI-powered document processing workflows to extract and process data from PDF documents and images. Azure AI Document Intelligence, OCR, Python. - Researched and implemented an advanced Error Logging and Bug Tracking System, resulting in a 76% increase in debugging efficiency. NLog, Elmah. - Completed 4 SQL database design projects, optimizing queries and developing tables, stored procedures, views, and functions. SQL Server Management Studio (SSMS).	

PROJECTS

- AI-Powered Test Automation:** Workflow for generating test cases and end-to-end test scripts using LLM and prompt engineering. Led the project from research to implementation.
- Sightline Legal Hold:** SaaS solution for managing legal hold workflows. Implemented key features including case management, user notifications, and Microsoft 365 integration.
- Admission and Enrollment Data Dashboard:** Business Intelligence dashboard to provide insights on application trends and geographic distribution of applicants.

CERTIFICATIONS

Microsoft Azure Developer Associate	Microsoft
Microsoft Security, Compliance, and Identity Fundamentals	Microsoft
Tableau Desktop Specialist	Tableau

EDUCATION

Certificate in Generative AI Software Engineering Vanderbilt University	In Progress 2026 - Present
Master of Public Affairs, Concentration in Information Systems Indiana University Bloomington
